

DZ-Manager Demo 2010

- Manifesting and Registration is possible at 3 Workstations at the same time
- All PCs are equipped with RFID-Readers to support DzM^R-Cards
- A new skydiver is registered within 90 seconds: his name and address is read from his German Health Chip-Card.
- Waivers are printed by DZ-Manager and signed by skydivers. This eliminates spelling errors due to unreadable handwriting and waiver-signing is finished in less than 60 seconds.
- Skydivers manifest using their contact less DzM^R-Card, taking less than 10 seconds.

Additional hardware

DZ-Manager - NOT connected to database
